

**6TH ANNUAL SOUTHERN NEVADA
SUMMIT ON
CHILDREN'S MENTAL HEALTH**
May 1 & 2, 2023 || Hybrid Event

The 6th annual Southern Nevada Summit on Children’s Mental Health was held on May 1 & 2 via in-person and virtual format, Zoom. Day 1 of the summit was organized by the CCCMHC’s Public Awareness & Behavioral Wellness Workgroups with the assistance of the Nevada Institute for Children’s Research and Policy at UNLV and Day 2 of the event was organized by the Southern Nevada Health District. The fee to attend the Day 1 of the summit was \$15, although accommodations were available on a case-by-case basis for those where cost was a barrier. For Day 2 of the summit, registration was free. Although there was a max of 15 participants, SNHD provided additional opportunities for those who wanted to attend this day. For Day 1, Table 1 (below) provides a breakdown of the number of people who registered online through the Eventbrite platform, as well as the highest number of people who recorded in attendance throughout the day; it also lists the total revenue collected for the event.

Table 1. Registration & Fees for Day 1

	# ATTENDED	# REGISTERED
IN-PERSON	31	37
VIRTUAL	25	35
TOTAL	56	72
		TOTAL REVENUE: 868.62

At this year’s Summit, attendees were provided a full day of training consisting of 5 different presentations on May 1st. On May 2nd, Youth Mental Health First Aid training was administered. The attached agenda for Day 1 (page 3) provides a description of each presentation as well as the name and affiliation of the lead presenter. Licensed professionals were able to claim up to 6 hours of Continuing Education Units from this summit, 2 credit hours being suicide prevention training provided by the Nevada Office of Suicide Prevention.

All Day 1 attendees were asked to complete a brief evaluation at the end of each presentation to provide feedback on each of the sessions and the event as a whole. The number of responses varied for each presentation, with the highest response received for both the Strengths-Based Approaches to Children’s Mental Health Services and Understanding the Impact of Policies on Children’s Mental Health (n=41). The lowest response received was from the Youth Panel (n=37). Overall, those who completed the evaluation surveys were satisfied with the learning opportunities provided. A detailed breakdown of these results can be found in Table 2 (below).
